

SOFT-LITE NOW OFFERS THERMA-TRU ENTRY DOORS

In 1982, ThermaTru launched a revolutionary invention...the fiberglass door. It looked as beautiful as wood but performed with the durability of steel. With this innovation ThermaTru changed the industry.

For 26 years ThermaTru has been the most innovative manufacturer in the Exterior Door industry. Today, they are the nation's leading manufacturer of fiberglass exterior door systems. In 2009 the company teamed up with Soft-Lite to offer a special value-added entry door package specifically designed for the remodeling industry.

WHAT MAKES THE SOFT-LITE THERMA-TRU SYSTEM BETTER THAN THE REST?

- It offers a complete full-system package designed specifically for home remodelers. This means you get the door slab, art glass, hinges and sill all in one comprehensive system.
- The standard frame system is fully rot-proof with optional composite frames and Schlage hardware.
- Each door comes standard with the Tru-Defense System. This system was designed for extreme coastal weather. It is THE BEST system in the industry, combining a High Dam Sill with composite construction and counter sunk screws which provide flush contact with the door bottom to seal out air and water. Also included are a Door Bottom Sweep that has dual bulbs with dual fins that sit tightly on the sill to prevent air and water infiltration, and an optional Rain Deflector that repels water away from all sealing components. ThermaTru is so sure this system will stand up to driving winds and rain that they offer homeowners a reimbursement of up to \$1,500 should water infiltrate into the home through the Tru-Defense System.
- A full system warranty is provided as one complete package. This includes the Labor Rider warranty in addition to the System warranty which includes a Water Leakage warranty. ThermaTru offers the only remodeling door program that includes a Water Leakage warranty along with a Lifetime warranty. Also, the art glass on their Classic Craft and Fiber Classic doors comes with a Lifetime warranty instead of the 10 Year warranty offered by most companies. Their Smooth Star doors come with a 20 Year warranty on the art glass.

OTHER SPECIAL FEATURES OF THE SOFT-LITE THERMA-TRU SYSTEM

- Comes in 3 series of doors: Classic Craft (in Oak, Mahogany and American Rustic), Fiber Classic and Smooth Star
- Virtually all doors meet the requirements for the 2009-2010 Tax Credit.
- ThermaTru's Fiber Glass doors offer excellent energy efficiency due in part to a solid polyurethane foam core which has five times the insulating value of wood.
- Door systems come 100% prefinished with stain or paint.
- 70 standard paint colors are offered with optional custom colors also available. In addition, 7 stain colors are offered. Paint and stain comes with a 2 year unconditional finish warranty that includes fading. Compare this with other manufacturers who offer a shorter timeframe or no warranty at all on their finish.
- The interior trim is also stained or painted.
- Jambs are clad
- An optional Multi-point locking system is available for enhanced security

Soft-Lite and Therma-Tru have put the best of the best together to bring you this amazing Exterior Door System that no other company offers to the remodeling industry.
