

Tax Credit for Installation of Energy-Efficient Windows & Doors

Official 2012/2013 Manufacturer's Certificate of Soft-Lite Gorell® Windows

This Certificate is intended to show that Soft-Lite Gorell Products qualify as Building Envelope Components eligible for a tax credit under the relevant Internal Revenue Code sections of the American Taxpayer Relief Act of 2012. Specifically, this bill reinstates the 25C tax credits that expired at the end of 2011, making the tax credit retroactive for qualified products installed in 2012 and extending the credit through the end of 2013. The tax law requires that mandates be met to qualify for the credit. Windows and doors may qualify for the tax credit if they meet the ENERGY STAR® program requirements of the climate zone in which the product(s) were installed. Homeowners should consult their tax advisor to determine whether they qualify for potential income tax credits under Section 25C of the Internal Revenue Code.

Soft-Lite Gorell L.L.C., is headquartered at 10250 Philipp Parkway, Streetsboro, OH 44241. Soft-Lite Gorell manufactures exterior windows that when purchased with optional Low-E glass and an inert gas fill (argon or krypton, where required to meet ENERGY STAR® criteria), in a double or triple glazed unit, meet or exceed the prescriptive criteria established by the IECC for all climate zones in which the windows or doors are installed. They also meet or exceed ENERGY STAR® program requirements (as in effect at the time of installation).

To certify the Soft-Lite Gorell products for purposes of tax credits available under Section 25C of the Internal Revenue Code ("IRC"), Soft-Lite Gorell represents that the following window products, when purchased with one of the optional glass packages mentioned above, are "Eligible Building Envelope Component(s)" that qualify for the federal income tax credit allowed under Section 25C of the IRC. The numbers listed on the certificate are NFRC's CPD numbers. These numbers designate the product line on the NFRC website at www.NFRC.org.

Model GOE-A-35 SH50 5000G
Model GOE-A-36 SHSL50G 5000G
