

Superior protection, energy efficiency, security, beauty and UV protection.

## 6400 Series Sliding Patio Doors

## Soft-Lite 6400 Sliding Patio Doors offer superb protection and energy efficiency.

Soft-Lite 6400 sliding patio doors provide a picture window view—yet are still specifically designed to give you excellent energy efficiency and unparalleled protection. 6400 Impact Doors are rigorously tested and rated to stringent industry DP-50\* standards, so they'll provide outstanding performance—even in the toughest conditions. Standard 6400 doors are super-strong doors that are perfect for locations such as coastal areas, that require doors that keep out wind and water, but don't need to include more costly "impact" glass. Standard 6400 doors achieve a DP-25 rating.

6400 patio doors are also designed to lower your home energy costs and greatly enhance the comfort level in your home. With a high-performance Low-E coating and argon gas fill, Soft-Lite 6400 doors are highly energy efficient.

These highly advanced doors provide other great benefits like greater safety and security, easy operation and extremely low maintenance. They offer a number of design options—such as various hardware finishes and colors—to enhance the beauty of your home, inside and out.

\*Design Pressure, or DP, ratings are site specific, depending on the region in which you live. Wind velocity—which is simulated with both positive (exterior wind pushing against the home) and negative (exterior wind pulling away from the home) pressure—factors into the DP rating that a product receives, as do air infiltration and water test pressure levels.

# 6400 Series Standard Features

1. Robotically sealed corners ensure the door panels stay square and also prevent water penetration and air infiltration.
2. Expertly engineered and incredibly durable vinyl frame with multiple structural hollows gives this door exceptional strength and insulating properties.
3. Three panes of glass—two of which sandwich a laminated interlayer—with an advanced Low-E coating and argon gas—provide exceptional energy efficiency and protection from severe weather\*.
4. Heavy-duty, reinforced door panels are extraordinarily strong to provide unsurpassed durability.
5. Premium-grade multiple weather seals, unique to this door's design, make the door virtually airtight to help eliminate the possibility of drafts.\*\*
6. Full-length interlocking panels give you optimal strength and security.\*\*
7. Anodized aluminum sill track helps prevent corrosion, and enables the door panel to glide smoothly.\*\*
8. This sloped sill is both beautiful and functional. It's a snap to clean and it is built to stand up to constant, everyday use.
9. Commercial-grade multi-point keylock hardware makes your door so strong and secure you can use it as your home's main entry. Stainless steel hardware components will hold up to the harshest coastal conditions.
10. Elegantly styled handles with a stunning contour design fit the shape of your hand—and add a touch of class.

\* Standard on 6400 impact doors only.

\*\* Features not visible in photograph

**11.** 100 percent vinyl screen frames feature BetterVue™ screens—made of durable, fire-retardant fiberglass yarns—that will give you a clearer view of the outdoors and added airflow for better ventilation.

**12.** Nylon tandem rollers make this door remarkably smooth and quiet to operate—as if on a carpet of velvet.

## PERSONALIZE YOUR NEW DOOR!
